Special Program –KAGURA DANCES– (30 min.)

Among famous Japanese traditional performing arts, *Kagura* is the oldest and its origin goes back to the ancient Japanese mythology.

The series of performances usually starts with a ritualistic dance to welcome the deities, and then entertaining performances follows.

Story

Orochi (The Giant Serpents)

One day the deity *Susano*, the brother of *Amaterasu*, came down to earth. He saw an old couple and their daughter grieving. They told him that seven of their daughters had already become victims to an eight-headed *Yamata-no-orochi*, and it was coming to attack their one last daughter that night.

He decided to overcome the serpent to save their daughter.
